

Ravindu Haputhanthri

Quality Assurance (QA) Intern

Dedicated and self - driven individual who is motivated by understanding deficiencies in own skills. Is passionate in academic work and has come up with many instances that reveal the ability in team work and true skills in problem solving. Would love to work with team members while leading or supporting them to deliver successful outcomes.

EDUCATION

Bachelor of Science Honours (Undergraduate) 2021-Present
University Of Kelaniya, Sri Lanka
(Computer Science-Level 3)

Completed Ditec Diploma in C#(.Net) 2019-2020
Esoft Metro Campus Kandy

PROJECTS

City Bank v.1.0.0

Developed a comprehensive Java application to streamline banking operations and enhance customer service. This system allows banking staff to create customer accounts, issue cheque books, manage employee operations, and calculate interest rates for customer deposits. It leverages object-oriented programming principles and database integration to efficiently handle a wide range of financial transactions and customer interactions. This project demonstrates skills in Java programming, data management, and financial operations, highlighting my ability to develop practical and efficient solutions for the financial industry.

and Central Province
Teams – 2015
- Member Of School Cricket
Team (From 2012 - 2016)

Vice President - SCSSA (UOK)

**Statistics and Computer
Science Student's Association.**
The main objective of this
association is to improve the soft
skills of the undergraduates which
are really required to have better
prospects.

Vehicle Sale Management System

Developed a comprehensive C# (.NET) application using Visual Studio 2022, facilitating seamless management of vehicle sales operations. This system provides dual-access levels (staff and admin) for efficient appointment scheduling, customer and employee recordkeeping, inventory management, vehicle details tracking, and automated employee salary calculations. This project highlights my C# programming skills, database proficiency, and adeptness in designing and implementing user-access-controlled applications tailored for the automotive sales industry.

C# | (.NET) | Visual Studio |SQL Server Management Studio

A Responsive Coffee Shop Website

Developed a dynamic and visually appealing Coffee Shop website using HTML5, CSS3, and JavaScript. The website boasts a responsive design, featuring a user-friendly header with search, navigation, and shopping cart components, flexbox-based home and about sections, grid-based menu and product displays, testimonial showcase, contact form, and blog/news section. This project demonstrates my proficiency in front-end web development, responsive design principles, and JavaScript for interactivity, highlighting my ability to create engaging online experiences for businesses.
